Petabridge

Petabridge helps .NET companies build highly available, mission-critical systems that can scale to meet current and future demand through innovative open source technologies like Akka.NET, NBench, DotNetty, and more.

Petabridge offers code reviews, architecture and review consulting packages to help teams like yours assess the strengths and weaknesses of your designs and applications. To give .NET developers the best possible tools to build highly available, mission critical systems. We'll give you and your team the tools, training, and technology you need to succeed.

In 2015, Petabridge launched in Los Angeles by founder and inventor, Aaron Stannard. Petabridge's goal is to give .NET developers the best possible tools to build highly available, mission critical systems.
